EMMA SARGSYAN

Data Science Student | Business Analytics & Automation Consultant

Calgary, Alberta • 403-401-3919 • emma53294@gmail.com • LinkedIn • GitHub • Portfolio

PROFESSIONAL SUMMARY

Entrepreneurial Data Science student who builds and ships real business systems, not just class projects. Founded Zoroliq, an independent consultancy designing dashboards, CRMs, booking platforms, and workflow automations for small-business clients, and personally built app.zoroliq.com, a live MVP SaaS platform, from database architecture through deployment. Comfortable across the analytics stack (Python, SQL, R, Tableau, Excel) with hands-on experience in data cleaning, statistical analysis, and dashboard development, plus applied competitive and product research experience through a Mount Royal University data science co-op. Combines technical execution with client-facing business consulting, stakeholder communication, and process improvement. Seeking a data analyst or data science internship where business context and technical rigor both matter.

TECHNICAL SKILLS

Programming: Python, SQL, R, TypeScript, HTML, CSS

Web & Product Development: Next.js, Supabase, PostgreSQL, Row-Level Security, Authentication & Booking Systems

Business Intelligence: Tableau, Power BI (learning), Microsoft Excel, Google Sheets

Analytics: Data Cleaning, Data Validation, Statistical Analysis, Exploratory Data Analysis, Dashboard Development, Data Visualization, Database Design

Automation: n8n, Google Apps Script, Workflow Automation, AI-Assisted Development

Business: Requirements Gathering, Business Analysis, Process Improvement, Project Management, Client Consulting, Stakeholder Communication

EXPERIENCE

Founder & Data Solutions Consultant | *Zoroliq* | *Instagram*

May 2025 – Present

Calgary, AB

- Founded and operate an independent data and automation consultancy, managing the full client lifecycle from discovery through deployment and ongoing support.
- Built and shipped app.zoroliq.com, a live MVP SaaS platform (Next.js, TypeScript, Supabase/PostgreSQL) with full authentication, onboarding, and booking/availability systems.
- Engineered a conflict-prevention slot generation system using PostgreSQL RPC functions and GiST exclusion constraints to guarantee scheduling integrity.
- Run requirements-gathering sessions with business owners to diagnose operational inefficiencies and scope technical solutions spanning websites, CRMs, booking systems, and dashboards.
- Architect workflow automations in n8n and Google Apps Script that streamline lead management and client communication, reducing manual data entry for clients.
- Maintain and iterate on a portfolio of live client systems based on ongoing feedback, balancing multiple concurrent engagements.

Data Science Co-op Student — Competitor & SaaS Benchmarking | *Answir Inc.*

Sep 2026 – Dec 2026

Calgary, AB (Remote)

- Conducted a structured competitor and SaaS benchmarking study for Answir's AI-powered investor relations platform, evaluating it against competitors on UI/UX, AI assistant capabilities, and pricing models.
- Designed a scoring framework assessing usability, feature completeness, AI performance, and overall product experience, applied consistently across all platforms.
- Explored the backend AI platform (interaction logs, queries, responses) and built a 20–30 prompt test set to evaluate response relevance, clarity, and consistency.
- Synthesized competitive research, SaaS best practices, and backend observations into a final report with prioritized, actionable recommendations for product, UX, and AI improvements.

Private Swim Instructor | *Propel Swim Company*

Aug 2023 – Present

Calgary, AB

- Operate an independent instruction business end-to-end — client acquisition, scheduling, invoicing, and long-term relationship management.
- Design individualized lesson plans and track client progress over multi-month engagements, adjusting instruction based on documented outcomes.
- Maintain a recurring client base through proactive scheduling and communication, sustaining strong client retention.

Leadership Instructor • Lifeguard • Swim Instructor | *YMCA Calgary*

Sep 2023 – Present

Calgary, AB

- Lead and train groups of instructors and lifeguards, coordinating scheduling and documentation across teams.
- Track and document participant progress across programs, maintaining accurate records used for certification and reporting.
- Resolve operational and safety issues in real time, applying structured problem-solving under time pressure.

PROJECTS

Zoroliq App | *app.zoroliq.com*

- Built a live MVP SaaS platform (Next.js, TypeScript, Supabase/PostgreSQL) for service businesses, including a full database schema with row-level security, authentication, onboarding, and booking/availability systems.
- Engineered a conflict-prevention slot generation system using PostgreSQL RPC functions and GiST exclusion constraints.
- Architected the platform around a four-layer product roadmap (Core Platform, Industry Modules, Automation Layer, AI Operator), with the Core Platform and booking/scheduling layer live in the current MVP.
- Documented the product via a design system, experience-design specs, and a structured knowledge base guiding ongoing development.

Peak-Hour Vehicle Activity Analysis | *Python, Excel*

- Cleaned and validated a real-world traffic dataset in Python, resolving missing and inconsistent records.
- Analyzed peak-hour vehicle activity patterns and produced Excel-based visualizations to communicate findings.
- Delivered a structured report summarizing trends and actionable recommendations.

Race Strategy Simulation | *Python, NumPy, Pandas*

- Built a statistical simulation modeling race strategy scenarios and performance tradeoffs.
- Visualized results to support strategy evaluation and decision-making.

Linear Regression & Matrix Analysis | *Statistical Modeling, Linear Algebra*

- Implemented and evaluated linear regression models grounded in matrix operations and vector spaces.
- Interpreted model outputs statistically, assessing fit and testing underlying assumptions.

EDUCATION

Mount Royal University

Sep 2024 – Present (Expected 2028)

Bachelor of Science, Data Science — Finance Concentration — Calgary, AB

Relevant Coursework: Programming for Data Scientists, Statistical Data Analysis, Introduction to Databases (SQL), Data Acquisition, Linear Algebra for Data Science, Mathematical Statistics, Introductory Accounting, Data Processing (DATA 3464), Introduction to Finance (FNCE 3227), Probability (MATH 3552)

SAIT — Dual Credit

Sep 2023 – Dec 2023

Object-Oriented Programming (Python) & Web Development — Calgary, AB

Bishop Carroll High School

Sep 2021 – Jun 2023

High School Diploma — Graduated one year early — Calgary, AB

LANGUAGES

English, French, Armenian, Russian

CERTIFICATIONS

National Lifeguard • Standard First Aid • CPR-C AED • Lifesaving Society Swim Instructor • Lifesaving Society Examiner
